

We provide detailed terminal data you need to make smart business decisions

Better functioning markets in the energy and chemical industry by providing insights and enabling intelligent decisions

### 1. Tank Terminals research database

Our database comprises of more than 10,390 tank storage facilities worldwide; such as tank terminals, petroleum refineries, crude petroleum export terminals, chemical sites, olefin plants, LNG plants, vegetable oil refineries, and much more. The extensive data collection consists of all independent terminals and many captive terminals.

### 2. Terminal Marketplace

Both terminal operators and clients of terminals know that the current commercial process of matching available tank capacity with tank demand is rather inefficient and slow. The Terminal Marketplace changes that by making it much easier to spot available capacity, enquire for tank capacity, bid, offer or book tank capacity.

### 3. Operations tools

TankTerminals.com comes with a range of operations tools, like the award-winning Vessel Clearing Tool (a fully-automated tool that helps you clear the vessel in 30 seconds instead of 30 minutes) and the 3SCL (which digitizes the SSCL process and streamlines communication between parties).

INSIGHTS GLOBAL

INSIGHTS GLOBAL

Independent Market Intelligence

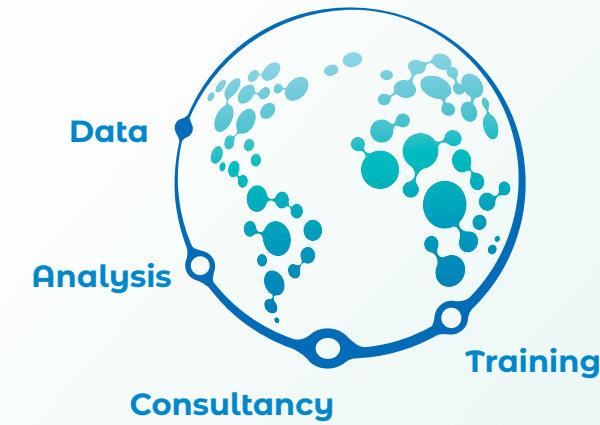

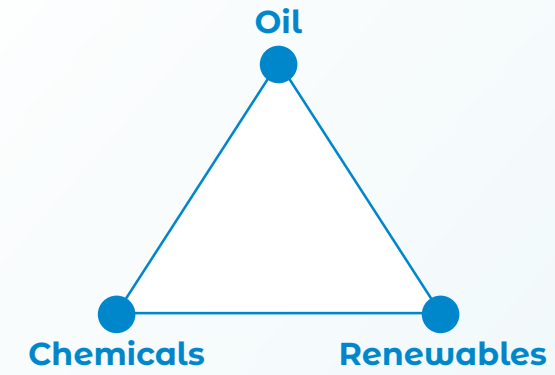

Enabling intelligent decisions

# About us

Insights Global is an independent market intelligence company specialized in international energy and chemical industries. We offer market data, market analysis reports, consultancy, tools and training services to our customers to support their commercial decision making.

## Focus

## Data

Get key insights in the supply, demand and transport of oil products in the Northwest European market. Our **Rhine Flow Service Report** provides reliable, up-to-date information on oil product trade flows between the Amsterdam-Rotterdam-Antwerp (ARA) region and the German, French, and Swiss hinterland markets. The **Barge Freight Rates Reports** provide information on freight rate levels for transporting oil products by inland tanker barges. Our quarterly **Global Tank Storage Rate Report** is the only authoritative source on storage rate information worldwide and keeps you updated on all indicative market rates for storing petroleum products in the four main global trade hubs.

## Analysis

Our analysts work continuously in assessing and sorting the gathered data to provide key insights. The sector and market analysis reports provide short, medium and long term forecasts and help to stay up to date by taking into account market fundamental changes.

Insights Global produces daily and weekly market analysis reports, giving insights in the markets and providing tools for our clients to gain more knowledge of short and medium term market fundamentals. Yearly reports are published to give a long-term outlook for various global hubs, including the ARA region and Singapore.

## What we stand for

Insights Global strives to improve markets in the energy and chemical business by enabling intelligent decisions.

Our data, analysis, advice, tools and training services are aimed at providing transparency and insights. We strive to base our conclusions on facts and have a scientific and sophisticated approach to structure our analysis. We put our customers first and support their goals with creative solutions to their intelligence needs.

## Training & Workshops

At Insights Global we made it our mission to share our knowledge, insights and skills with the tank terminal industry. With the **Oil Academy** you familiarise yourself with the most important topics in the oil industry. The **Energy Transition Training and Workshop** are aimed at helping you turn the Energy Transition into a business opportunity. The **Petrochemical Supply Chain Training** provides a deep-drive through the entire petrochemical supply chain. In the **HSEQ Training**, you will learn how to develop a safety culture, implement safety management systems, and prepare your business to deal with what-if scenarios in case of an incident.

## Consultancy

Over the past years, Insights Global has helped numerous organisations with gaining insights in various elements of the oil and chemicals supply chain, with a focus on the midstream and downstream oil, chemicals and renewables markets. Our data driven and quantitative approach combined with our knowledge of the sector has proven to build added value for our customers. We have a flexible team of senior consultants that take on customized research assignments. Besides these strengths, our company has the advantage of an extensive network that gives our company a competitive edge.
