# GLOBAL TANK STORAGE RATE REPORT

Imagine having access to reliable and accurate storage rate information straight from your inbox. Introducing our new Global Tank Storage Rate Report: a quarterly report containing indicative market rates for storing petroleum products in the four main global trade hubs (Houston, ARA, Fujairah, and Singapore).

THIS REPORT IS IDEAL FOR:

- ▶ Oil Traders
- ▶ Tank Terminal Operators
- ▶ M&A Investors

In our Global Tank Storage Report we cover applicable rates as of the date of publication, and typical terms and conditions apply with regards to tank size, contract duration, and included throughput allowances. For optimal comparison, we quote rates both in the currency and units that are used in the respective hub, as well as US\$/cbm per month so that the rates can be compared across the hubs. In this sample report, we give you a sneak preview of what you can expect in the full report. Our data on storage rates for gasoline and other low flash products, middle distillates like gasoil and diesel, and (residual) fuel oil are invaluable for any professional.

## Where the data comes from:

We strive to provide the most accurate data available in the market. In order to do that, in the month of publication, we call the market players (e.g. brokers, terminal operators, and traders/majors) and discuss the current market rates. They provide Insights Global with either rates based on recent (max. 3 months old) transactions, bids or offers, or indicative rates that are in line with the current market fundamentals. They also provide specific T&C's.

Based on this information, we determine the rates that we publish, always taking into account that we publish rate levels based on typical T&C's - i.e one-year contracts; typical tank size and tank configuration; ship in ship out; 6 to 8 tank turns included; located in the specific hub; blending, heating, and other services excluded; normal T&C applicable.

## DO YOU WANT TO RECEIVE THIS REPORT EACH QUARTER DIRECTLY INTO YOUR INBOX?

Request the Global Tank Storage Rate Report today. It is the single authoritative source of storage rate information available worldwide and provides full transparency on price levels in the global tank storage market.

After registration, you will receive each quarter:

- ▶ An unparalleled overview of market rates for storing petroleum products.
- ▶ Rates per hub: Houston (USA), ARA (Europe), Fujairah (Middle East) and Singapore (South-East Asia)
- ▶ Rates per product group: low-flash products, middle distillates, fuel oil.
- ▶ Historic data on evolution of storage rates at quarterly frequency.

Click on the button below, fill in the form and our sales team will get in touch with you on how to get access to this source of data on quarterly basis.
